

Videoconferencing Opportunity

September 28, 2001, (4:00 E.S.T.)

Our Linking Agent Network has afforded us the opportunity to make connections using videoconferencing technology.

Joe Dimino, the EMSTAC Linking Agent representing Eugene, Pleasant Hill, and Los Angeles School Districts will facilitate this videoconferencing event. Dr. Dimino is trained in using the Peer Assisted Learning Strategies Intervention (PALS) to facilitate reading achievement for students.

Through this videoconference session, you will:

- Receive an introduction and overview of the major strategies related to the Peer Assisted Learning Strategies (PALS) Program (Fuchs and Fuchs).
- Observe the classroom practices of educators trained extensively in PALS techniques as they implement the intervention in their classroom.
- Pose questions regarding the PALS intervention to fellow Linking Agent, Joe Dimino.
- Establish a relationship with a network of Linking Agents who share a similar commitment toward implementing a research-based intervention to address student reading.
- Obtain resources that will help you make a decision regarding whether PALS is right for your setting.
